INVESTMENT OBJECTIVE

The Definitive RealFin Global Flexible Fund is an internationally focused multi asset flexible fund and will invest a minimum of 80% offshore. The investment objective of the portfolio aims to maximise the total returns over the long term for the investor

INVESTMENT MANDATE

The portfolio will invest in a flexible combination of listed and unlisted investments, being equity securities, exchange traded funds and notes, non-equity securities, preference shares, property, convertible stock, Financial instruments, money market and assets in liquid form in both local and offshore assets. The portfolio's investment in listed and unlisted investments will be subject to permissible investments in terms of the Act, relevant board notices and any subordinate legislation.

High

- Generally these portfolios hold more equity exposure than any other risk profiled portfolios and therefore tend to carry higher volatility
- Expected potential long term returns could be higher than other risk profiles, in turn potential losses of capital could be higher

CUMULATIVE RETURNS

FLEXIBLE FUND PERFORMANCE SINCE INCEPTION

FUND COMMENTARY

January started off well for the stock market with the return of President Trump to the White House and his 'America First' policy agenda, which gave a boost to US equities. However, towards the end of the month, the US markets heavy tech focus weighed on performance as the release of China's artificial intelligence (AI) company, DeepSeek, led investors to question the ability of US tech companies to perform in comparison. In particular, DeepSeek's ability to create efficient, low-cost AI models negatively impacted Nvidia, the largest stock in the S&P 500 Index and we saw Nvidia's market value dropped by nearly \$600 billion in a single day at the end of January, setting a record for the largest one-day loss in US stock market history. Despite this, movements in the markets were still positive with the All Country World Index closing 3.38% higher. Over the previous few years we have seen the exceptionalism in the US lead to an outperformance in the market, however, this month we saw a change in the trend as Europe led the way with the Euro Stoxx 50 (+8.1%), the Euro Stoxx 600 (+6.38%) and the German Dax (+9.16%). While returns in the US were adequate, they were not as strong and the S&P 500 and the Nasdaq returned 2.78% and 1.66% respectively, hurt by the month-end performance of the tech sector. Value stocks outperformed growth stocks with respective returns of 4.5% and 2.6%. The MSCI Emerging Market Index closed the month 1.81% higher with the Hang Seng Index in China contributing 1.20%.

President Trump's proposed policy mix of tax cuts, immigration restrictions and tariffs sparked expectations of higher inflation in the US, pushing bond yields higher globally resulting in significant volatility in bond markets in January. The Bloomberg Global Aggregate Bond Index closed higher (+0.6%) due to a narrowing of credit spreads and due to a softer than expected December US inflation report. Gold and other metals were also beneficiaries of the Trump tariffs and this led to the Bloomberg Commodity Index closing 4% higher.

The gains made in European markets were due to the strength shown in the financial and consumer discretionary sectors owing to the solid global economic backdrop. Additionally, there are signs of improvement in the overall economic data for the region with retail sales coming in at 1.2%, the fifth consecutive month of growth, and the Purchasing Managers Index moving into expansionary territory with a reading of 50.2 in January. The UK also recorded positive gains for the month (FTSE 100 +5.5%) mainly as a result of a depreciation in the pound which positively affects the index as most of the revenue is earned offshore.

Moving to the east, China's equity markets marginal climb higher was a result of positive investor sentiment due to less aggressive tariffs from President Trump aimed at the region and improved domestic economic data. After a stellar year last year, Japanese equities took a breather with the Nikkei delivering a flat return (-0.81%) as the Bank of Japan delivered a 25 basis point interest rate hike. This placed upward pressure on the yen which in turn negatively affected the export-oriented index.

IMPORTANT INFORMATION

RealFin Collective Investment Schemes (RF) Proprietary Limited ("RCIS") is registered and approved by the Financial Sector Conduct Authority (FSCA) as a manager of Collective Investment Schemes approved in terms of the Collective Investment Schemes Control Act. This document is for information purposes only and does not constitute or form part of any offer to issue or sell or any solicitation of any offer to subscribe for or purchase any particular investments. The information contained in the MDD does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act, and should be read in conjunction with the "RCIS Fund Information Document," which can be found on the RCIS website www.realfin.co.za. Opinions expressed in this document may be changed without notice at any time after publication. We therefore disclaim any liability for any loss, liability, damage (whether direct or consequential) or expense of any nature whatsoever which may be suffered as a result of or which may be attributable directly or indirectly to the use of or reliance upon the information.

DISCLOSURES

- Collective Investment Schemes are generally medium-to long-term investments.
- Definitive Realfin Global Flexible Fund** should be considered an investment with a time horizon of longer than a year.
- The value of participatory interests (units) may go down as well as up.
- Past performance is not necessarily a guide to future performance.
- Where different classes of participatory interests apply to certain Portfolio's, they would be subject to different charges.
- Collective investments are traded at ruling prices and can engage in borrowing and scrip lending.
- A schedule of fees and charges and maximum commissions, is available on request from RCIS.
- RCIS does not provide any guarantee in respect to the capital or the return of the portfolio.
- RCIS may suspend repurchases for a period, subject to regulatory approval, to await liquidity.
- RCIS may borrow up to 10% of the market value of the portfolio where insufficient liquidity exists in a portfolio, or where assets cannot be released to withdraw or cancel participatory interests.
- RCIS reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate.
- Forward pricing is used.
- In terms of the Collective Investment Schemes Control Act, No.45 of 2002 (CISCA), RMB Custody and Trustee Services (A division of FirstRand Bank Limited) has been appointed by RCIS as the Trustee of **Definitive Realfin Global Flexible Fund**.
- The portfolio is valued at **15H00 on each business day**.
- Investment and Redemption Instructions will be processed according to: The transaction cut-off time as well as the Subscription and Redemption guidance stipulated within the General Information section of the Minimum Disclosure Document.
- Any capital gain realised on the disposal of a participatory interest in a collective investment scheme is subject to Capital Gain Tax (CGT).
- A money market portfolio is not a bank deposit account. The price of a participatory interest is a marked-to-market value. The total return to the investor is made up of interest received and any gain or loss made on any particular instrument, in most cases the return will merely have an effect of increasing or decreasing the daily yield. In the case of abnormal losses it can have the effect of reducing the capital value of the portfolio. Excessive withdrawals from a money market portfolio may place the portfolio under liquidity pressure and in such circumstances a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed.
- Where foreign securities are included in a portfolio, this may impose potential constraints on liquidity and the repatriation of funds. The portfolio can be impacted by macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks and potential limitations on the availability of the market information. Fluctuations or movements in exchange rates may cause the value of underlying offshore investments to go up or down.
- A Fund of Funds Portfolio only invests in other portfolio's of collective investment schemes which levies its own charges, which could result in a higher cost structure for these portfolios.
- RealFin Collective Investment Schemes (RF) Proprietary Limited has entered into a co-naming agreement with and delegated the investment management function to **Definitive Asset Management Proprietary Limited (FSP 29465)**
- RCIS retains full legal responsibility for **Definitive Realfin Global Flexible Fund** and performs Risk Management oversight.
- Application forms can be obtained via the RCIS website www.realfin.co.za and any additional information can be requested from RCIS at manco@realfin.co.za
- Should you have any complaints, please send an email to complaints@realfin.co.za. Our Complaints Policy is available on our website: www.realfin.co.za
- RCIS has a Conflict of interest policy, Protection of Personal Information Policy and Treating Clients Fairly Policy which is available on request.

TRANSACTION CUT-OFF TIMES

In order for **daily Investment Instruction** to be processed, the Investment form needs to be sent **before 14h00** for your investment form to be processed on the **current business day ("Cut Off Date")**. Your funds need to be reflecting in our bank account before 14H00 ("Cut Off") for your investment to be transacted at the current day's price. Proof of payment must be sent to clientservices@realfin.co.za. Any funds received after Cut Off time, shall be retained by the Manager in a separate account and shall be invested (together with any interest which has accrued thereon) on the next available Investment Date.

In order for your participatory interests in the portfolio to be redeemed at the current day's price ("Redemption Date"), your Redemption Instruction must be submitted to RCIS **before 14h00** on the **Redemption Date**. If your withdrawal occurs on a non-business day, you will receive the next business day's price. All redemptions must be submitted in writing and will be executed following receipt and acceptance of such instruction. Please note that in the case of daily traded funds, redemption settlement may take up to **14 business days**.

Investors wishing to redeem units amounting to more than % of the total market value of the relevant portfolio must provide the manager with at least 7 business days' written notice of such redemption. If this notice is not received by the manager, the manager may treat such withdrawal as only having taken place on the 7th Business day after such instruction is received. However, where the amount to be redeemed is in excess of 10% of the total market value of the portfolio, the parties shall determine the actual date of withdrawal through mutual agreement.

PERFORMANCE CALCULATION

CIS prices are calculated on a net asset basis, which is the total value of all the, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Performance has been calculated using NAV to NAV figures with actual portfolio ongoing fees taken into account. Income is reinvested at the reinvestment date. Different classes of participatory interests apply to these portfolio's and are subject to different fees and charges. Actual investment performance will differ based on the initial advice fee, ongoing advice fee, investment date, the date of reinvestment of distributions and dividend withholding tax. Initial advice fees have not been taken into account. Cumulative performance figures are calculated using lump sum investment amounts. Income distributions, prior to the deduction of applicable taxes, are included in the performance calculation. Performance calculations are available on request from RCIS.

PERFORMANCE FEES

Performance fees shall be calculated separately for each class at each Valuation Point. Performance fees are accrued and are payable at the end of the relevant Performance Fee Measurement Period. The calculation is based on whether the respective Class has achieved a return greater than the Fee Hurdle and where applicable, above the high watermark. A detailed description of how performance fees are calculated and applied for this portfolio is available on request from RCIS.

TER

The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Calculations are based on actual data where possible and best estimates where actual data is not available.

TC

Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.
